Proudly Serving the Central West, South West Slopes, Central Tablelands and Western NSW

WELCOME to the 2023 Rocklyn ram sale

It is shaping up to be a cracking season around Greenethorpe this year, with near perfect sowing conditions and rainfall throughout the winter months. Pastures are looking healthy and we have again supplement fed to balance nutrition in our flock and stud stock with so much green feed about.

Our new shearing shed and covered yards have been a highlight addition to the farm this year and they have already passed the test on several occasions.

2023 sees a change in our selling agent, with our Stud Stock Advisor, Scott Thrift, making the change to Australian Wool Network. Kevin Miller, Whitty, Lennon and Co. will also be assisting with the sale.

The sale rams are again looking good, backed by some impressive figures. We have increased the sale numbers to 100 this year to help cater for increased buyer demand, with the majority of rams being polls.

Rocklyn continues to offer top genetics and heavy cutting, dual purpose Merinos with good early growth rates. The wool remains around 19 micron and is long stapled, bright, soft handling and well nourished with good crimp definition.

Up-to-date ASBVs and selection indexes have been included in our sale catalogue, with trait leaders identified to help guide buyer selections. Rocklyn has now achieved a 5-star data quality rating, meaning that buyers can place even more faith in our figures.

Rocklyn sale rams can be found on RamSelect if buyers utilise this tool to make their decisions.

More information is available upon request so please don't hesitate to chat with me prior to the sale about your breeding objectives and seek advice on which rams may suit your flock.

I would like to welcome returning clients and new buyers to the 2023 Rocklyn Merino Stud ram sale.

- Ralph Diprose

SELLING SYSTEM

The 2023 Rocklyn Merino Stud on-property ram sale auction will be conducted by AWN. Normal auction conditions with a buyer number system will apply. Please register with AWN on the day of the sale, before the sale begins.

HEALTH STATUS

Rocklyn is a brucellosis accredited free flock, has been Gudair vaccinated since 2002 and has owner declared footrot free status.

REBATE

A 2% rebate applies to outside agents settling within 7 days of the sale.

DELIVERY

Please make arrangements for delivery/ pick up of rams on the sale day.

For all your
wool, livestock &
property needs

For more information contact your
local AWN representative today

DISCLAIMER

All reasonable care has been taken to ensure the information provided in this catalogue is correct at the time of printing however, Rocklyn Pty Ltd nor AWN accept any responsibility for the accuracy, interpretation or repeatability of the information included.

The 2023 Rocklyn sale rams

One hundred rams will be offered at the 2023 sale including 90 poll Merinos and 10 horned Merino rams. The majority of sale rams have been paddock run this year, with only lots 1-23 shedded since 9 July ahead of the SWS Merino Breeders Field Day.

The majority of rams on offer at the 2023 on property ram sale will be poll Merinos.

Measurement and management dates:

- Majority of rams born July-Aug 2022. Lots 51-62 born to ewe lambs Aug-Sept 2022. Gudair vaccinated and treated with scabigard at lamb marking.
- Shorn and fleece weighed 12 April 2023.
- Fat and eye muscle scanned by Trevor Pearce on 18 July 2023.
- Wool mid-side sampled 8 Aug 2023. Tested by Riverina Wool Testers.
- Body weights for sale catalogue done on 30 August 2023.
- Drenched with Zolvix and Sheepguard, and booster vaccination of Glanery 7 in 1 + B12 given on 30 August 2023

Rocklyn Merino Stud is proud to be affiliated with the NSW Stud Merino Breeders Association, MerinoLink Ltd and Sheep Genetics' MERINOSELECT.

A SAMPLE OF THE 2023 SALE RAMS

Explanation of terms

When selecting rams, it is important to take these factors into consideration and combine this information with a visual assessment of the rams. Further data is available upon request.

Measured performance data

Sire	Sire of the ram - see sire summary on page 6 for further information.
POLL	The Poll status of the ram. Double poll (PP) or double horn (HH) indicate a greater likelihood of the type repeating in progeny.
BT	Birth type. Single (1), twin (2) or triplet (3).
Micron	Micron - the mean fibre diameter in microns of all fibres measured (8 August 2023).
SD	Standard deviation of the fibre diameter (8 August 2023).
CV	Coefficient of variation of the fibre diameter (8 August 2023).
CF	Comfort factor - percentage of fibres under 30 micron (8 August 2023).
BWT	Body weight in kilograms (30 August 2023).

Australian sheep breeding values (ASBVs)

YCFW	Yearling clean fleece weight (kg) - rams with higher YCFW ASBVs produce progeny that will cut more wool.
YFD	Yearling fibre diameter (μm) - rams with more negative YFD ASBVs produce progeny which are finer.
YSL	Yearling staple length (mm) - rams with more positive YSL ASBVs will produce progeny with longer staple length.
EBWR	Early breech wrinkle - rams with more negative EBWR ASBVs will produce progeny with less breech wrinkle and, in general, less body wrinkle as well.
PWT	Post-weaning weight (kg) - rams with more positive PWT ASBVs produce progeny that grow quicker and are heavier at an earlier age.
YWT	Yearling weight (kg) - rams with more positive YWT ASBVs produce progeny that grow quicker and are heavier at a certain age.
YFAT	Yearling fat depth (mm) - rams with more positive YFAT ASBVs will produce progeny that have more subcutaneous fat, which improves reproduction rate and meat quality.
YEMD	Yearling eye muscle depth (mm) - rams with more positive YEMD ASBVs will produce progeny that have more muscle, independent of weight, and a higher lean meat yield.
WR	Weaning Rate (number of lambs weaned per ewe joined). Progeny of rams with higher WR ASBVs will on average wean more lambs. WR replaces the previous trait titled Number of Lambs Weaned (NLW).

Selection indexes

A selection index combines ASBVs for several traits to give a single value. This reflects the performance of the sheep relative to the breeding objective of the particular index.

MP+	Merino Production Plus Index - ranks animals on their ability to produce progeny for a fine wool operation that has significant surplus sheep sales. The index is aimed at producers whose sheep income is a balance of both wool and surplus sheep sales. It is for self-replacing merino flocks who do not keep their wethers to produce wool.
DP+	Dual Purpose Plus Index - ranks animals on their ability to produce merinos for dual purpose operations. The index is aimed at producers whose majority of sheep income comes from sheep sales. It is for self-replacing merino flocks that do not keep their wethers and also join a portion of their ewes to terminal sires for lamb production.

The ASBVs and Selection Indexes provided in this sale catalogue for the sale rams are correct as at 21 August 2023 and have been obtained through Sheep Genetics MERINOSELECT. ASBVs change over time as more data is submitted to Sheep Genetics. Updated figures can be provided on request.

For more information on ASBVs visit sheepgenetics.org.au where you can download a range of brochures and fact sheets including a copy of the following booklet titled 'A Pocket Guide to ASBVs'.

PRIVATE RAM SALES

Following the on property ram sale, surplus rams and those not included in the sale will be available for purchase through private sales.

If you would like to arrange a viewing of the rams, please contact Ralph Diprose after the ram sale.

Graded rams will also be available through private sales following the on-property ram sale.

Rocklyn offers high quality dual purpose Merino rams with top genetics.

Independent Breeding Advice and Services You Can Depend On
